

“I like being able to use my schooling

on a more personal level than what you would typically find in a more structured setting. Working for UCP has proved to be a great alternative to a career in nursing. It allows me to use my skills and training as a medical assistant to enhance the lives of individuals with mobility and other issues. But what I find most rewarding is the opportunity to make and build meaningful relationships with the people I support.”

~ Elizabeth “Liz” C.
